## Summary

**A dynamic, detail-oriented Web Developer** with a year of experience developing fully responsive, user-friendly, single-page applications. Capable of applying agile methodologies to design, develop, and implement features and improvements that support user interface concepts. Adept ability to communicate and collaborate with different teams of developers to produce a minimum viable product and fulfill project deadlines.

## Skills

Javascript │ JQuery │ GraphQl │ MongoDb │ Express │ React │ Node │ MUI │ Tailwind │ Bootstrap │ Agile │ Rest API │ Git Version Control │

## Projects

**Study Buddies** │ [Repo](Repo) │ [Deployed](Deployed)

- **Summary** : Developed a full-stack web application that helps users manage and access coding resources, enabling them to maximize their study productivity.
- **Role** : Applied MVC software architecture patterns to develop and construct a REST API which uses a mySQL relational database paired with Sequelize ORM.
- **Technology** : JavaScript, JQuery, Handlebars, Express, Node, mySQL, Sequelize

**Finance Tracker** │ [Repo](Repo) │ [Deployed](Deployed)

- **Summary** : Built a MERN full-stack web application to provide users with an intuitive and user-friendly solution for tracking and managing their finances.
- **Role** : Provided assistance to back-end development by designing models, resolvers, and typeDefs for REST API. Additionally, led the integration of a REST API to React front end, utilizing GraphQL queries and mutations.
- **Technology** : React, MongoDB, Mongoose, Node, Express, Graph Ql, Material UI

**Weather Dashboard** │ [Repo](Repo) │ [Deployed](Deployed)

- **Summary** : Constructed a single page React application which uses Open Weather API to retrieve and display weather forecasts.
- **Role** : Consumed data from two 3rd party APIs ensuring data was correctly received, formatted, and integrated.
- **Technology**: React, Javascript, 3rd Party API, Local Storage, Tailwind

**Hangry** │ [Repo](Repo) │ [Deployed](Deployed)

- **Summary** : Implemented Edamam recipe search API to create a web application that displays recipe inspiration personalized by dietary & nutritional search filters.
- **Role** : Played a key role in leading research and integration of 3rd party API, correctly fetching data and dynamic displaying it back to the user.

- **Technology** : JavaScript , JQuery , 3rd Party API , Bootstrap

## Experience

**Child Development Teacher** **2019**
**Child Development Center Buckley AFB** Aurora, Co

Effectively communicated with coworkers, supervisors, and parents to ensure the safety and well-being of preschool students. Established and sustained strong relationships with students by providing emotional and social development support through encouraging positive self concepts.

- Collaborated and coordinated with other teachers to form lesson plans that met course requirements for a group of twelve preschool students.
- Supported daily operations by organizing, planning, and prioritizing work through the development of specific goals, plans, and actions to achieve desired objectives.

**Customer Services Representative / Shift Leader** **2017-2019**
**Domino's TIP  Inc** Aurora, Co

Managed and led a small team of drivers and customer service representatives in a fast paced environment. Leveraged outstanding leadership skills to schedule duties, delegate tasks, and enforce policies to ensure operational efficiency.

- Improved customer satisfaction by providing exceptional customer service and adjusting to the consumers demands.
- Generated actionable insights by analyzing data sale reports and addressing areas of concerns.
- Contributed to the success of a five star establishment by proactively supervising my team and ensuring a safe and welcoming work environment.

## Education

**University of  Denver** **January 2023**
Flex Full Stack Web Development Boot Camp - Online Certificate

**Community College Of Aurora** **March 2022**
Associates of General Studies
